Switch operating Instructions

IT IS ESSENTIAL THAT MICROPHONES ARE NOT CONNECTED WHEN PROGAMMING

1) Apply power with switch pressed.

2) Unit gives regular flash for 2 seconds on LED to show set up mode entered.

3) Press switch the number of times of the programming mode you wish to check or change. The interval between key presses must be less than 1 second.

4) After the mode has been selected the LED will flash the number of times of the option currently set.

5) Press the switch the number of times of the option required. The interval between key presses must be less than 1 second.

6) The LED will flash the number of times of the option already set.

7) The unit then returns to stage 2, ready for setting more options.

8) The unit will return to normal operation after 5 seconds if the key is not pressed.
